

Windows

This guide explains how to connect to the eduroam Wi-Fi service for LAMDA staff and students using a Windows device. Please note:

- You need your LAMDA user ID and password
- Any devices over 5 years old may not connect and will not be supported
- Make sure you are in a location where the eduroam wireless network is available

Instructions

Method 1

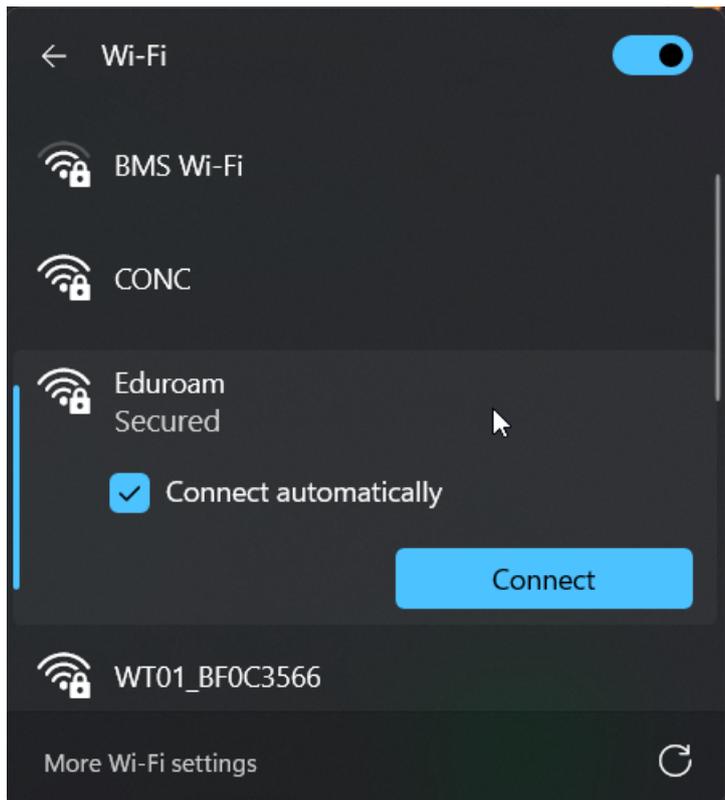

The simplest and securest way to connect to eduroam is by using the eduroam Configuration Assistant Tool. Please see [Connecting to eduroam using eduroam CAT \(Configuration Assistant Tool\)](#) for instructions.

Method 2

With Windows, you can also use the [geteduroam](#) App. Please the geteduroam app for instructions.

Method 3

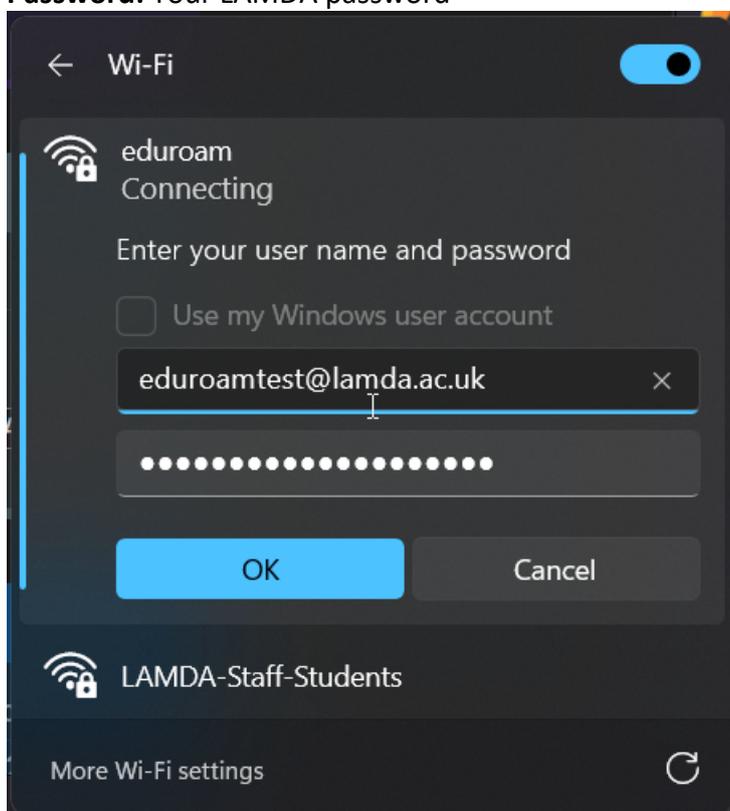

1. Click the **Network** icon to view a list of available **Networks**.
2. Select **eduroam** from the list of available **Networks** and select **Connect**

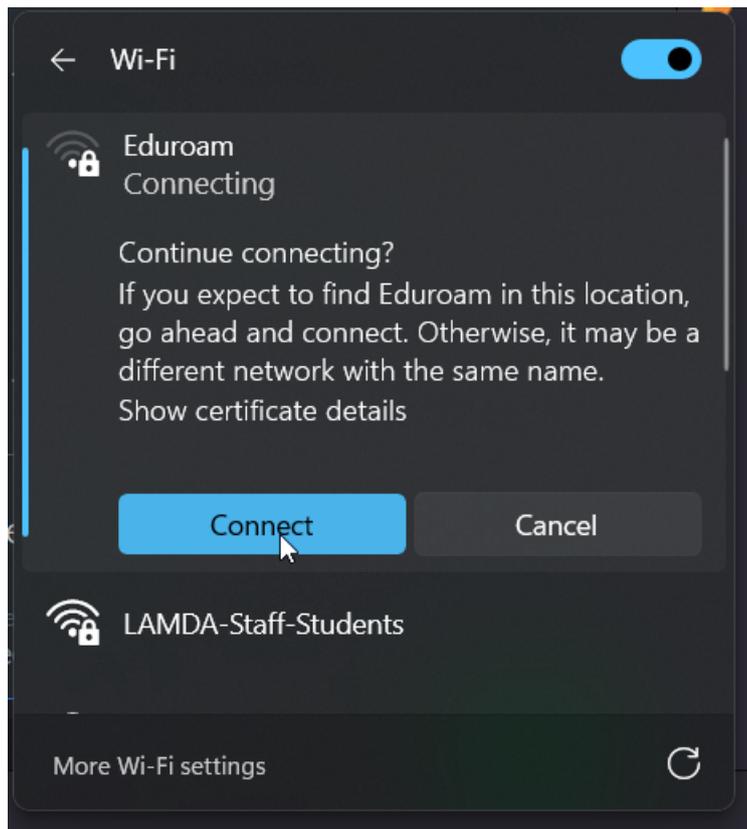

3. You will be prompted for your username and password. Enter the following details:

Username: Your LAMDA user ID

Password: Your LAMDA password

4. You will be asked if you wish to **Continue connecting?** Select **Connect**.

5. If successfully authenticated the status will change to **Connected**. This may briefly display as **Limited**. You will now be connected to the eduroam service.
